ANESCAN

EMR for Anesthesia

Digital Data Collection System

Paper Simplicity

Digital Efficiency

The AneScan™ System

AneScan™, is the point of care, electronic health record system that will allow the anesthesia group to digitize the entire perioperative process. It is designed to interface with other hospital IT systems at a fraction of the cost of conventional systems. The AneScan™ system is designed to specifically meet the needs of the anesthesia provider at the “point of care”, and seamlessly populate billing software. It is easy to integrate, adopt, and will enhance workflow while providing an immediate financial return for your anesthesia group

Easy to Use

The AneScan™ EMR for anesthesia allows the entire Anesthesia paper process to be digitized while maintaining control of entered information. Customized electronic forms and records facilitate ease of use and rapid adoption while electronic prompts and checks help assure billing accuracy.

Centralized administrative control creates extraordinary workflow efficiencies.

The system eliminates laborious manual entry and coding by administrative personnel.

Mobile and Versatile

Your anesthesia providers are able to work across multiple departments and facilities seamlessly entering data on easy to use form factors. Whether typing on a desktop pc, laptop with touch screen capability or handwriting on a hospital grade tablet, the AneScan™ system is easy to adopt and implement and gives administrative control from a central location. Information is stored in a HIPPA compliant ultra secure data center and allows records to be easily viewed and imported to populate billing software.

AneScan™ EMR Features:

- Software as a SecureService (SaaS)
- Mobile platform
- Intuitive and easy to use
- Easy implementation
- Predictive input touch screen
- Corrective prompts
- Patient demographic interface
- Barcode capability
- Centralized administrative tools
- Software updates included
- Reportable data points
- Quality and compliance metrics
- HIPPA compliant security
- Digital anesthetic record storage
- Smart card compatible

AneScan™ software works on
PC's, Tablets, Laptops
